Anchors for
Mounting
Surface

Phillips
Screwdriver

1. Turn off the Display

On the side of the Operations Display, press the Power button to turn off the Display.

2. Replace Communication Cables

Disconnect the USB cable from the back of the Display. Connect the USB cable from the Wireless Modem.

3. Secure Modem

Mount Wireless Modem on Wall using appropriate anchors or to another solid surface for protection.

4. Connect AC Power

Plug the Wireless Modem's power adapter into an AC receptacle.

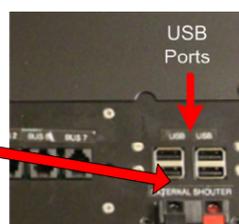

5. Install Wireless Modem in Controller

Using the 4 screws provided, mount Wireless Modem inside the control box.

6. Connect Communication Cables

Connect the USB cable to one of the Controller's USB sockets.

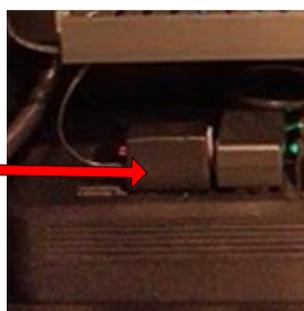

7. Install Antenna

Route the antenna cable through the bottom of the control box and mount on top of the control box.

8. Connect AC Power

Plug the Wireless Modem's power adapter into one of the UPS AC receptacles.

9. Turn on the Display

On the side of the Operations Display, press the Power button to turn on the Display.

10. System Start Up

Wait two minutes for the app to run and load the pool, graph, action, and alert information on the screen.

11. Secure Cables and Control Box

If the pool names appear, communication has been verified.

Secure cables.

Close Control Box door and secure with two screws provided.

12. Troubleshooting

If there is no communication, check that both Wireless Modems are connected to AC receptacles and have power.

Check that all cables are securely connected.
