

Stealth Watering System™

Gravity Tank (FLT-GT)

Philadelphia Scientific®
industrial battery innovation

Installation:

1. The unit is shipped in one carton and is completely assembled.
2. Install 5 gallon tank at a height of at least **5 feet** above the top of the battery for the Float Valve.
3. Fill Tank with deionized water.

Operation Instructions:

1. Attach the output hose on the gravity tank to the Input/Filter Assembly on the Stealth Watering System™ on the battery. Filling will begin as soon as they are connected.
3. Once the spinner stops and all the Float Indicators are up, the battery filling is complete.
4. Disconnect the Quick-Connect to stop the flow.

NOTE

This water supply is not for use with Philadelphia Scientific Water Injector System™ or Philadelphia Scientific Watering Guns
