

MAKE REAL-TIME DECISIONS USING REAL-TIME DATA

Unlock the full potential of your lead-acid batteries with the eGO!gateway, the revolutionary device that bridges your battery data to your online portal in real-time. Designed for seamless integration with all eGO! models, the eGO!gateway empowers you to take action like never before. Featuring an integrated SIM card, it ensures a secure, always-on connection to the internet, so you stay informed and ahead of potential issues.

With instant data uploads, you gain critical insights into battery performance, usage patterns, and maintenance needs. With this critical information available at the click of a button, you can make proactive decisions that extend battery life, reduce downtime, and maximize operational efficiency. Whether managing a few premium batteries in a small battery room or an entire fleet in a large DC, the eGO!gateway gives you the power to optimize your battery assets, lower total cost of ownership and increase your ROI.

Why wait for problems to arise? With eGO!gateway, you're always one step ahead allowing you to be proactive, not reactive, and preventing problems before they become wider, operation affecting issues.

SMART DATA, MAXIMUM PERFORMANCE

- ✓ **OPERATIONAL EFFICIENCY**
Using an eGO!gateway means no more site visits from an engineer to collect the data.
- ✓ **COMPLETE COMPATIBILITY**
The eGO!gateway collects data from the entire eGO! range of battery performance monitors.
- ✓ **SECURE DATA TRANSMISSION**
Secure, isolated eGO! data collection and transmission system.
- ✓ **RELIABLE CONNECTIVITY**
Seamless connectivity with remote support capability.
- ✓ **SIMPLE INSTALLATION**
Simply install the eGO!gateway on a wall and connect the power cable.
